PROJECTS

AlgoViz-SortingAlgorithmVisualizer

- Created a responsive web page to visualize some common sorting algorithms using HTML,CSS and JavaScript.
- Model supports the user in selecting algorithm, size of the array, and also speed of the visualization.
- Tech: HTML,CSS, JavaScript

SkySnap-Meteorological Information Tool

- Developed a weather information application that provides current weather conditions and fore-casts for -user -selected cities.
- Demonstrates integration with externalAPIs, error handling, and responsive interface design.
- Tech: HTML, CSS, JavaScript (consuming a public weather API).

RentNest-Property Rental Marketplace

- Developed real-time property search and filtering features for fasterproperty discovery.
- Built a unified interface for hosts and guests to improve overalluser experience.
- Tech: MongoDB,Express.js, React.js, Node.js

WORK EXPERIENCE

Web Development Intern | Bharat Intern Nov 2023-Dec 2023

- Worked as a Web Development Intern, building responsive web pages using HTML, CSS, JavaScript, and React.
- Improved user interface and overall website performance by implementing clean and efficient code.
- Gained hands-on experience through real projects, debugging issues, and collaborating with team members.

Frontend Developer Intern | Triazine Software Feb 2026-April2026

- Developed a Student Grade Tracker to manage and calculate student marks using HTML, CSS, JavaScript and React.
- Calculated total marks, average, and grade automatically based on user input.
- Added validation to prevent empty inputs and ensure accurate grade calculation.
